A HORRIBLE THEORY .- The late execution in Paris has revived the old question whether death instantaneously follows upon the sever-ance of the head from the body. In a letter to the Gaulois, Dr. Pinel asserts that decapitation does not immediately affect the brain. The blood which flows after decapitation comes from the large vessels of the neck, and there is hardly any call upon the circulation of the cranium. The brain remains intact, nourishing itself with the blood retained by the pressure of the air When the blood remaining in the head at the. moment of separation is exhausted, there commences a state, not of death, but of inertia, which lasts up to the moment when the organ, no longer fed, ceases to exist. Dr. Pinel estimates that the brain finds nourishment in the residuary blood for about an hour after decapitation. The period of inertia would last for about two hours, and absolute death would not ensue till after the space of three hours altogether. If, he adds, a bodiless head indicates by no movement the horror of its situation, it is because it is physically impossible that it should do so, all the nerves which serve for the transmission of orders from the brain to the trunk being severed. But there remain the nerves of hearing, of smell, and of sight .- Pall Mall Ga-

SCENE IN THE SOUTH CAROLINA LEGLISLA-TURE. - The Columbia Guardian says: "Quite an amusing scene, and one indicative of the digni ty of that august body, occurred in the House a day or two since. Delarge having procured something in the appearance of an apple pie, was dividing it very generously among such of his confrees as were seated next him, when Elliott, who was seated some distance off, rushed up, and in rather peremptory terms, demanded a slice. As to the pie, Delarge's liberality had diminished, and there being but a single slice remaining, he replied to Ethiott's demand by ramming that hastily in his own mouth. lott was not be so easily robbed of his expected treat-like an eagle he pounced upon De-large, member from Charleston, and grasping him by the throat, endeavored to choke him into a more generous state of mind. Being the stouter, and having the advantage in position, he standing and the other seated. Elliott succeeded in jamming Delarge's head down upon his chair, when the latter ended the encounter by using his knife upon his antagonist's leg, send ing him scampering away to his seat, amid the laughter of the House."—Chas. TRANSFER OF LAND IN ENGLAND. -The extraordinary costiliness attending the transfer of land by purchase in England has recently been the subject of investigation in that country. -Tables have been compiled of the purchase money and of the corresponding expenses of obtaining the deeds in a large number of instanees, from which it appears that, under the present system, the title papers, in cases where the price of the property amounts to \$5,000 require an expenditure six of per cent., or \$300. Individal cases, however, have occurred, where the burden is much heavier-thus in one instance upon an investment of \$500 in land the transfer required an expenditure of \$119, or nearly twenty four per cent. In connection with this subject, the English journals are praising the system for the transfer of land in force in Belgium. Each parish has an engraved plan, divided into sections, of its territory. On this map each piece of land has its number, and the name of the owner is registered, and every change of boundary and alteration by purchase, is entered on the books and rectified upon the

THROAT DISEASES. - Electricity, as a remedy for fatigue, hourseness, sore throat, and other ailments from which vocalists suffer so severely has recently been recommended by the physician attached to the Paris Opera house. He asserts that five pupils of the Conservatory, who came to him to be treated for horseness, loss of voice and affection of the larynx, were electrified and cuted. The patients were required to sing both before and after treatment, and the difference between the respective conditions of the voice was very remarkable. After having been electrified, the respiration of the patients was better and deeper, and their voices stronger, fuller and more pure. The same treatment was made use of to remedy the hoarseness of an eminent male opera singer, who was, in consequence, enabled the same evening to perform a difficult part with triumphant and

AN AMERICAN LADY'S INTERVIEW. - Figuro tells this story of an American lady, who desired the blessing of Pius IX upon an armful of beads. "Is that all?" patiently asked the Pope. "Holy Father, your photograph." "Here it is; anything more?" "Your autograph, if you please, upon the carte de visite." The Pope hesitated a little, but signed nevertheless. "Now is there any other favor you were going to ask?" "Oh, Holy Father, give me, if you will, the pen with which yot wrote your name. This was too much even for the Pope's good nature, and be said, "Yes, take it. Carry away the penholder, too. Here, take the inkstand ! The American cooly rolled all the articles up in an old newspaper, carefully placed them in her carpet bag, and departed with a sweet

smile and a reverence to the Pope. CANNED FRUITS and VEGETABLES, Brandy Peaches, Sardines, Preserved Gin-ger, English and American Pickles, &c., for AVERY & DAVIDSON,

When the misguided and imprudent votary of pleasure finds that he has imbibed the seeds of this painful disease it too often happens that an ill-timed sense of shame or dread of discovery deters him from applying to those, with from education and respectability, can alon befriend him, delaying till the constitutional symptoms of this horrid disease make their apsymptoms of this horrid disease make their appearance, such as ulcerated sore throat, diseased nose, nocturnal pains in the head and limbs, dimness of sight, deafness, nodes on the shin bones and arms, blotches on the head, face and extremities, progressing with frightful rapidity till at last the palate of the mouth or the lone of the nose fall in, and the victim of this awful disease becomes a horrid object of commissoration, till death puts a period to his dreadful suf-

tion, till death puts a period to his dreadful suf ferings, by sending him to "that Undiscovered Country from whence no traveller returns."

It is a MELANCHOLY FACT that thou sands fall victims to this terrible disease, owing to the unskilfulness of ignorant pretenders, who, by the use of that DEADLY POISON, MY R-CURY, ruin the constitution and make the residue of life miserable.
